

Khözema Chitalwala,
Principal Architect, Designers Group

I was born yesterday.

My favourite structure (designed by someone else) Sydney Opera House.

I am inspired by beauty.

Architecture to me is life.

I wish I had designed (and how would that have been different from now) something immortal.

My worst design trying hard to create one.

My best design putting best effort to create one.

My signature design element (one element without which no design of yours seems complete) colours and play of light.

To unwind I spend time with my family.

If I was not an architect I would have not been a complete human being.

Society Interiors to me is one of the best sources of information in the interior industry.
